We have forgotten how to die in the West. We shuttle the dying to hospitals where death is considered a 'disease' and extraordinary measures are taken to prolong life at all costs. Families do not know how to come to closure with the passing of a loved one. Many people die in fear, with unresolved issues, not having said the "I love you" and "I forgive you" that would be so healing for them and their families.

We no longer remember how to die with grace and dignity. This introductory lecture with Chris Williams-Prietto, a Healing the Light Body Sr. Staff member will address the need for something greater than what is currently available and will introduce the tangible tools of Shamanic Energy Medicine that bring closure, dignity and peace at the end of a person's life.
